ASSASSINATION COMMISSION
9/15/64

A40

I do not share the finding of the Commission as to the probability that both President Kennedy and Governor Connally were struck by the same bullet. The expert testimony, based on measurements and surveys, including reenactment of the motortrip of the Presidential party on that fateful November 22nd presents a persuasive case. However, the movement of one of the victims by either leaning forward or to either side or rising a few inches from his seat would have made a considerable difference in the mathematical computations.

I join my colleagues in the belief that three shots were fired but, to me, the testimony of Governor Connally that he heard the first shot fired and strike the President and turned before he himself was wounded makes more logical a finding that the first and third shots struck the President and the second shot wounded Governor Connally. Reviewing the Zapruder film several times adds

1789-1985

to my conviction that the bullet that passed through Governor Connally's body was not the same bullet as that which passed through the President's back and neck.

In addition, from carefully examining the site where the tragedy occurred, I am convinced that any marksman firing from the sixth floor of the Texas Schoolbook Depository Building who could shoot with the deadly accuracy which caused the wounds suffered by President Kennedy would have been highly unlikely to have fired a shot that completely missed the other occupants of the President's automobile or the automobile itself. The fact that no trace of a third bullet was found either on the automobile or several feet of paved street on each side of the Presidential car is to me convincing evidence that all three shots fired by the assassin found their targets in the bodies ofthe President and the Governor of Texas.

All of the evidence assembled indicates that he was unsuccessful in all of his attempts.

The lack of ability to explore fully and completely every lead and suspicion generated by the evidence is sufficient basis to preclude me from sharing in a categorical finding that Oswald planned and perpetrated the assassination without the knowledge, encouragement or assistance of anyother person.
